PERSONAL STATEMENT

Am a recent Product Design graduate from Nottingham Trent University. The duration of my studies has allowed me to gain a continuous understanding of design language and apply those principles to several industrial projects. Acquired practical experience in Website Design and Development through freelance work involving the use of design tools and HTML, CSS, and JavaScript, and being a part of the Nottingham Trent University Design Industries cohort to build a platform for the year's undergraduate product design students to showcase their work. Seeking to expand my skillset with Trilogy Education Services to develop technical expertise in Front-End Web Development.

EDUCATION

Nottingham Trent University *(2018 – 2022)*
Bachelor of Science in Product Design
- **Honors:** Second Class Honours (2nd Division)
- **Relevant Work:** NTUDI Website, NTU Masters in Product Design Website

Hinchingbrooke School and Sixth Form *(2011 – 2018)*
A-Levels: Computer Science, Design and Technology: Product Design, Cambridge Technicals Business Level 3
GCSEs: 9 A-C including Mathematics, English Language, Sciences and Design and Technology

WORK & LEADERSHIP EXPERIENCE

dcloud9 ltd.   London, United Kingdom
Alliance Team, DevOps Engineer   July 2022 – Present
- Training to become a DevOps Engineer – learning the fundamentals of AWS and the basics of Infrastructure as Code (IaC) tools like Terraform.
- dcloud9 ltd.:
  - Trusted Research Environment (TRE)
    - Successfully built the TRE architecture for dcloud9 using Infrastructure as Code to automate the provisioning of configuration files. Built the TRE Organisations and Accounts for dcloud9 ltd.
    - Utilised Gitlab CI/CD pipeline to deploy code more efficiently
  - Website
    - Designed and developed the official website for dcloud9 ltd. using HTML and CSS

Nottingham Trent University Design Industries (NTUDI)   Nottingham, United Kingdom
Lead Web Design and Developer, Website Team   September 2021 – June 2022
- Designed and built the official NTUDI website. The website was successfully built as many visitors were directed to the site; employers from design industries visited the website most frequently.
- Website Team.:
  - UI Design and Prototyping
    - Allocated each team member to a specific web page of the website to generate concepts.
    - Instructed team members on how to use Adobe XD, Figma and Wix.

- Managed the allocated timeframes for each task to maintain efficiency.
- Attended bi-weekly sessions to present to the NTUDI cohort on the design thinking for each design of the web pages, main considerations included sustainable design, user experience design, and branding.
- Successfully debugged certain web page elements using JavaScript on Velo by Wix.

SKILLS, ACTIVITIES & INTERESTS

Technical Skills: HTML, CSS, JavaScript, Terraform, Git

Certifications & Training: Responsive Web Design, UX/UI Design, JavaScript Algorithms and Data Structures, Front End Development Libraries, AWS Cloud Practitioner Fundamentals, Terraform, Harvard University: CS50's Web Programming with Python and JavaScript.

Awards: Cambridge Consultants Design Challenge, 2019
